## The request to Commission (2005-)

*Create a coherent EU-platform for assessment and communication of environmental footprint of products and organisations*

## GOAL

**An internal EU market for green products without barriers – as a provision for a Circular (Green) EU Economy**

# The reality regarding environmental communication in the market

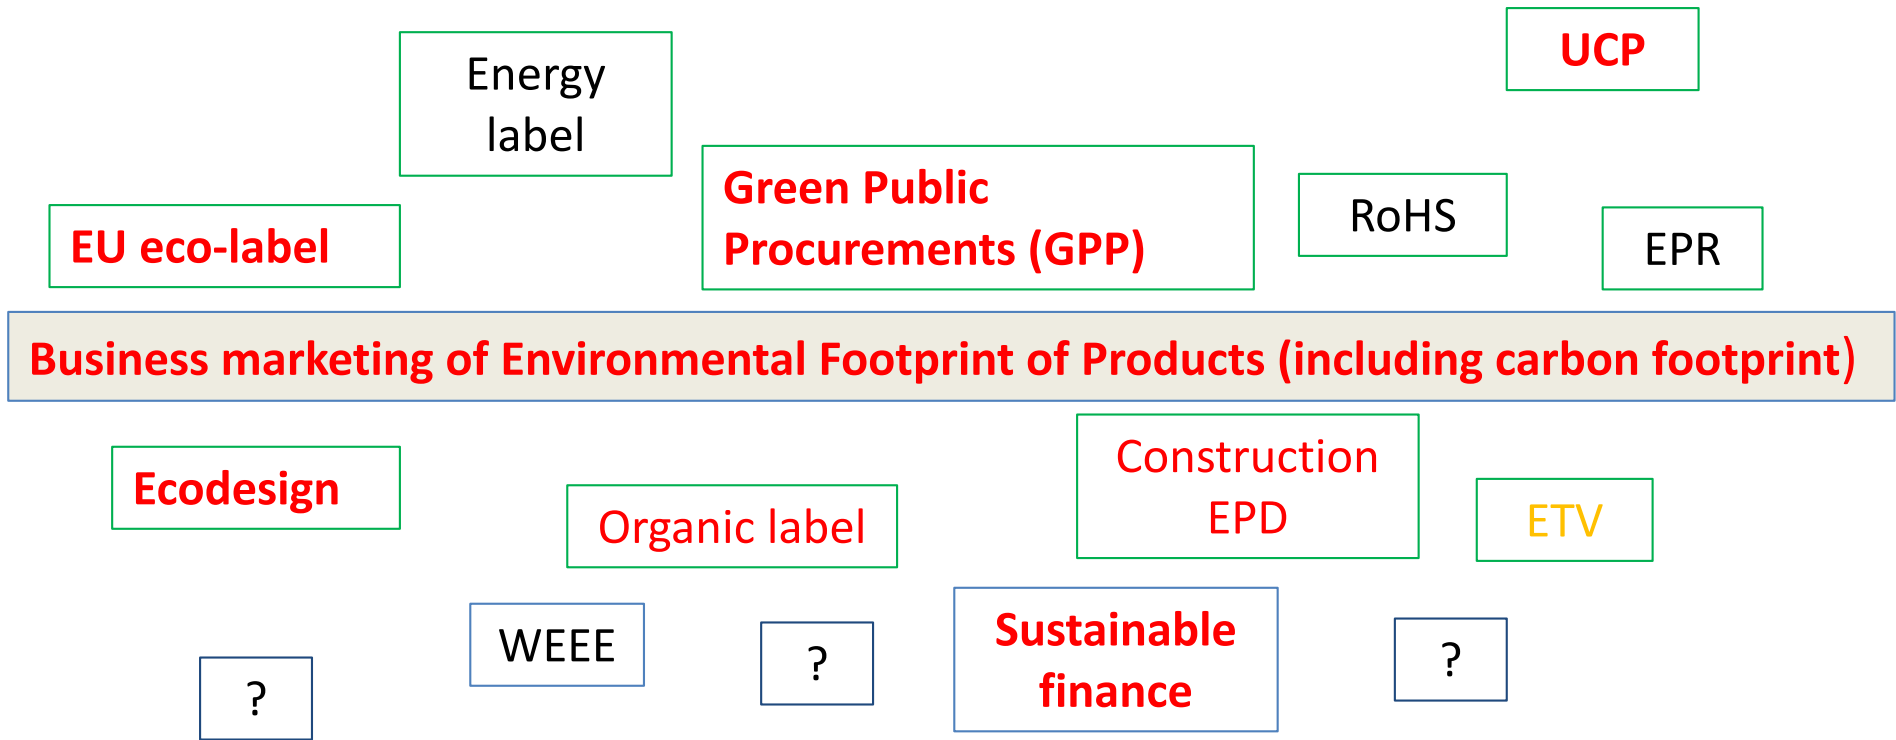

## The result (2018):

The Product Environmental Footprint (PEF) toolbox  
– a common EU harmonized LCA fundament for  
*“valid”* assessment of *“green”*

### What's in it:

- **Product Environmental Footprint (PEF): LCA method developed by the EU Commission - tested and published in Official Journal (2013)**
- **“Easy going” EU approved rules for product category PEFs (PEFCRs)**
- **Guidelines for independent verification**
- **Rules for establishment of product category specific benchmarks**
- **Principles to be applied for fair market communication of “green”**

The Product Environmental Footprint (PEF) toolbox

# The 16 impact categories

**Climate change**

Eutrophication, terrestrial

Ozone depletion

Eutrophication, aquatic freshwater

Human toxicity, cancer effects

Eutrophication, aquatic marine

Human toxicity, non-cancer effects

Ecotoxicity (freshwater)

Particulate matter/Respiratory inorganics

Land use

Ionising radiation, human health

Water scarcity

Photochemical ozone formation

Resource use, mineral

Acidification

Resource use, energy carriers

## 1<sup>st</sup> wave of pilots

-  Batteries and accumulators
-  Decorative paints
-  Hot & cold water pipe systems
-  Liquid household detergents
-  IT equipment
-  Metal sheets
-  Non-leather shoes
-  Photovoltaic electricity generation
- ~~ Stationary~~
-  Intermediate paper products
-  T-shirts
-  Uninterrupted power supplies
-  **Retailer sector**
-  Copper sector

## 2<sup>nd</sup> wave of pilots

-  Leather
-  Thermal insulation
-  Beer
- ~~ Coffee~~
-  (Fish)
-  Dairy products
-  **Feed**
-  (Meat)
-  **Pet food**
-  Olive oil
-  Pasta
-  Wine
-  Packed water

# New PEFCR pilots (2019-21)

*For COM decision medio Oct 2019*

PEFCR / product category	Coordinated by
<b>Apparel</b> (including accessories, dresses, hosiery, underwear, leggings/ tights, baselayer, jacket, jersey, pants, shirts, skirt, socks, sweater and cardigans, swimwear, t-shirt, boots, cleats, court, dress shoes/ heel, other athletic shoes, sandals and sneakers)	Sustainable Apparel Coalition <a href="mailto:pef@apparelcoalition.org">pef@apparelcoalition.org</a>
<b>Cut flowers and potted plants</b>	Coöperatie Royal FloraHolland U.A. <a href="mailto:pietbriet@royalfloraholland.com">pietbriet@royalfloraholland.com</a>
<b>Flexible packaging</b> (low, medium and high functionality flexible packaging)	Amcor Group GmbH <a href="mailto:isabelle.jenny@amcor.com">isabelle.jenny@amcor.com</a>
<b>Floor coverings</b> (rugs & runners, synthetic turf)	The European Carpet and Rug Association (ECRA) <a href="mailto:edmund.vankann@ecra.eu">edmund.vankann@ecra.eu</a> EMEA Synthetic Turf Council (ESTC) <a href="mailto:stefan@estc.info">stefan@estc.info</a>
<b>Marine fish</b> (wild caught marine fish and marine fish from marine open net pen aquaculture)	Norwegian Seafood Federation (NSF) <a href="mailto:henrik.stenwig@sjomatnorge.no">henrik.stenwig@sjomatnorge.no</a>
<b>Red meat</b> (beef, pork and sheep)	European Livestock and Meat Trades Union (UECBV) <a href="mailto:info@uecbv.eu">info@uecbv.eu</a>

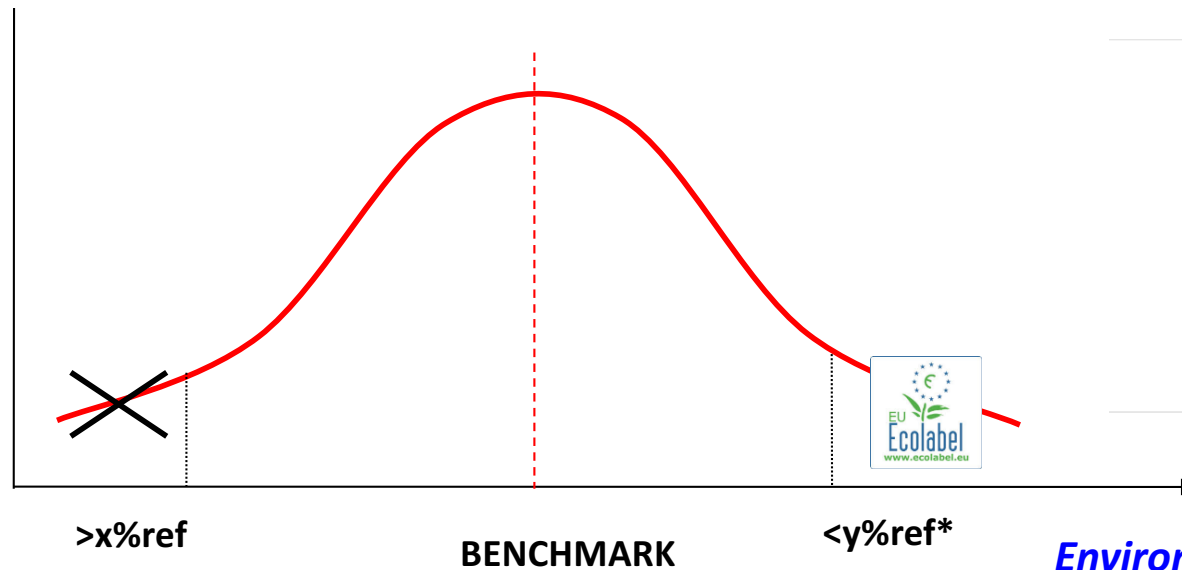

# Product category Benchmark - "Classes of performance"

Product group: XYZ

Attribute: Single attributes or weighted average

*Number of products*

*Environmental performance of products – the "PEF"*

The average environmental performance of products within the product category

# “Made Green in Italy” scheme

The national **voluntary scheme** for environmental qualification of products has been established by the National Law 221/2015 containing measures to promote *green economy* and to reduce the use of natural resources (Art 21)

This scheme adopts the **PEF methodology** to evaluate the environmental footprint of products, as defined by the Recommendation 2013/179/EC and following guidance.

The enforcing Regulation has been drafted by the **Ministry for Environment** and recently adopted (**Decree March 21, 2018, published on May 29, 2018**).

Ministero dell'Ambiente e della  
Tutela del Territorio e del Mare

Acqua

Aria

Energia

Natura

Territorio

Marine  
Stewardship  
Council

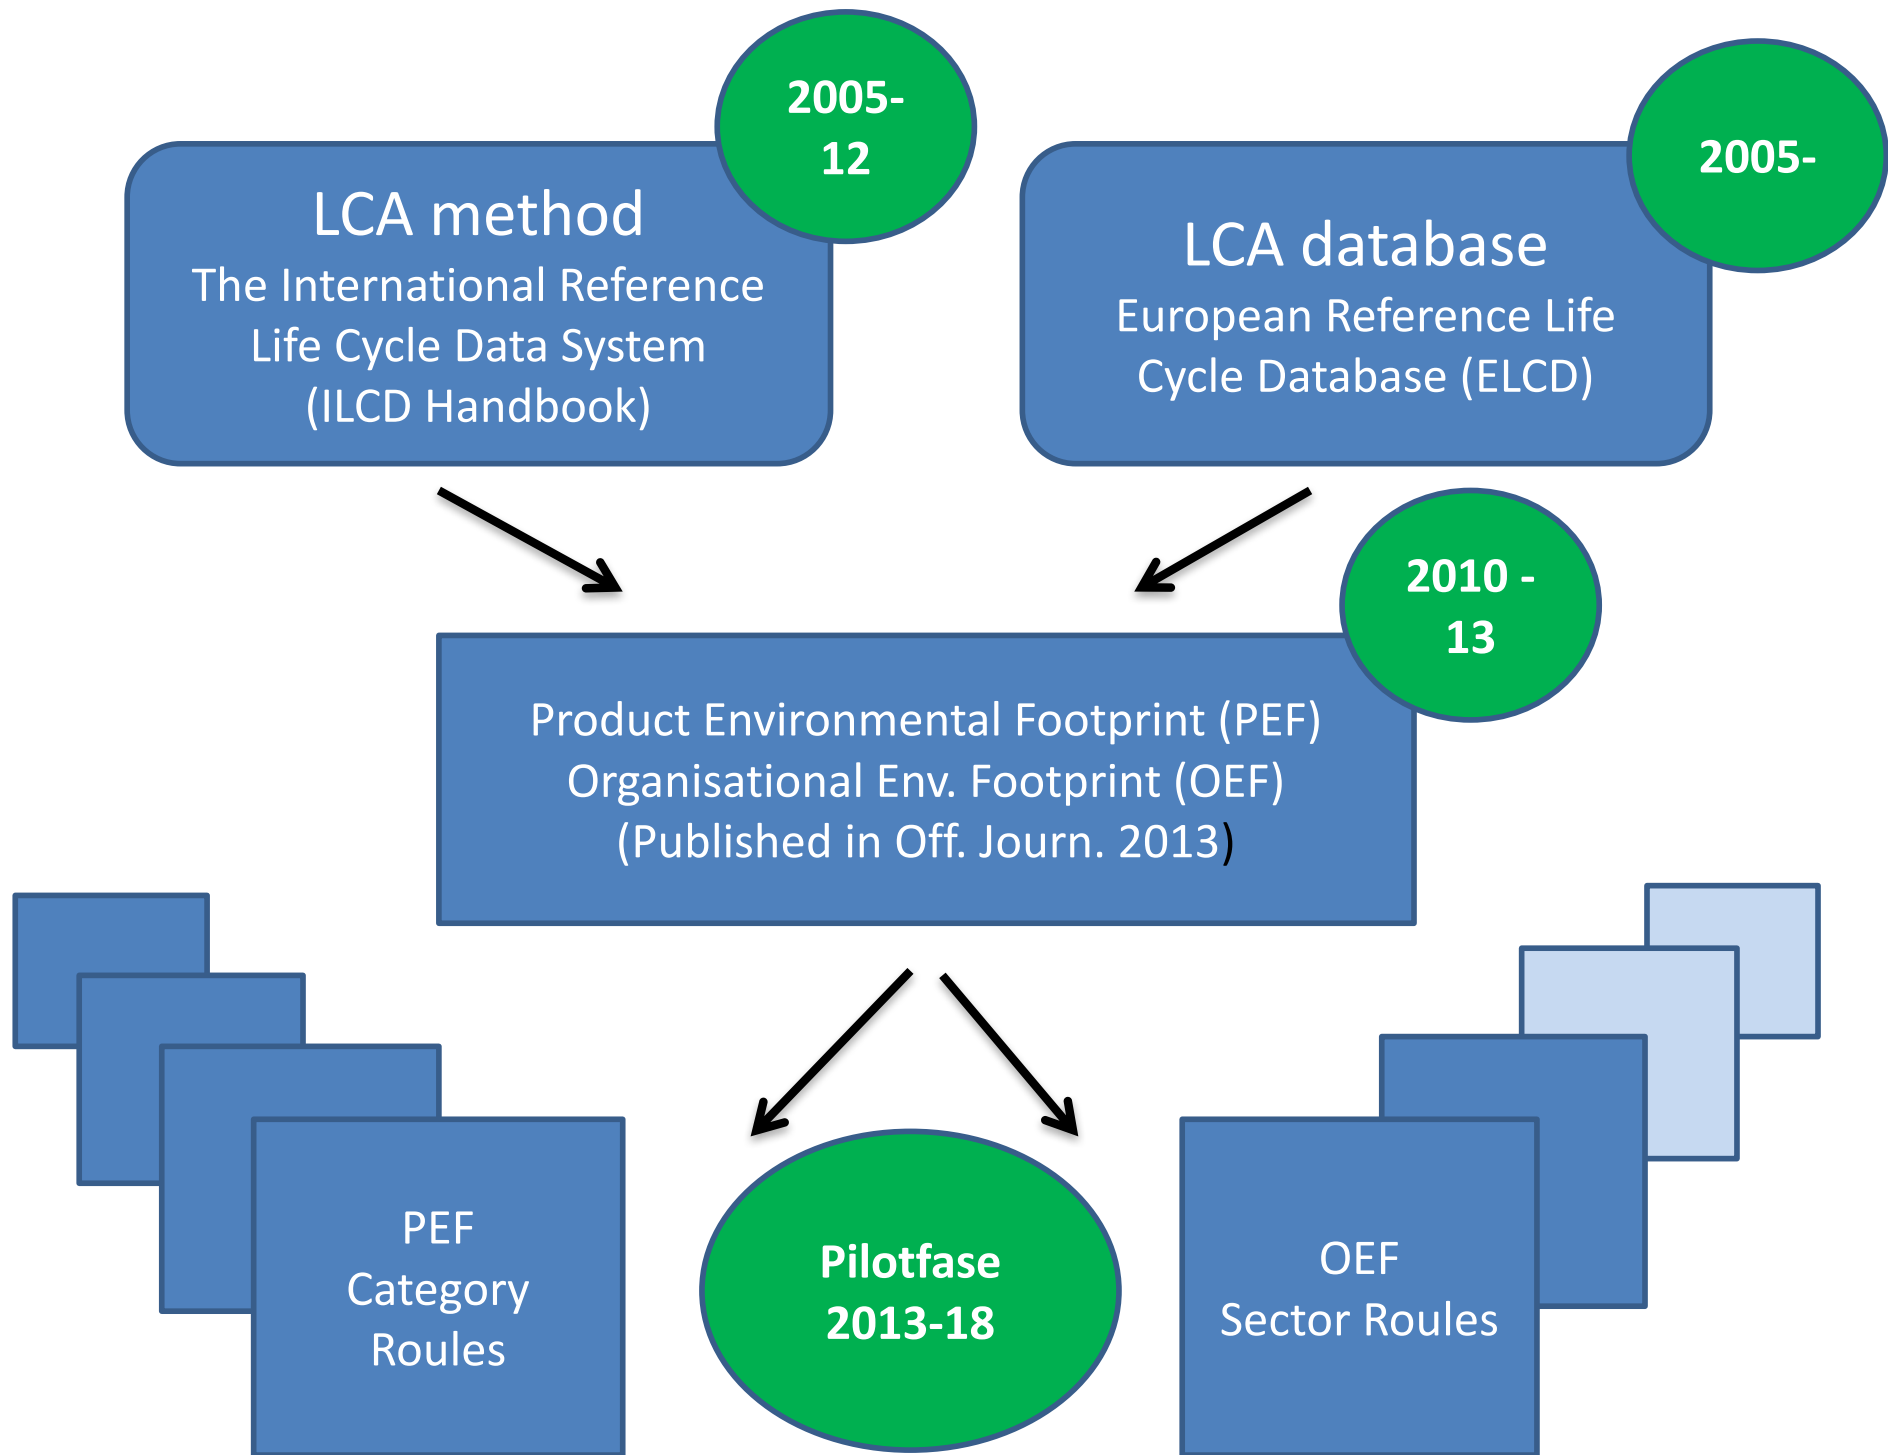

Go for a PEF alignment in  
cooperation with  
Marine Fish PEFCR pilot???

## European council of Ministers (Environment) Meeting conclusions – June 2019

- “WELCOMES all initiatives to support the communication of environmental impacts based on the Environmental Footprint pilot and in time eventually the establishment of a **mandatory scheme for environmental claims**”;
- “CALLS ON the Commission to assess **the possible application of ecodesign principles beyond energy-related products** and put forward a legislative proposal, as appropriate”;

**THANK YOU!**

PEF  
strength  
and  
weakness

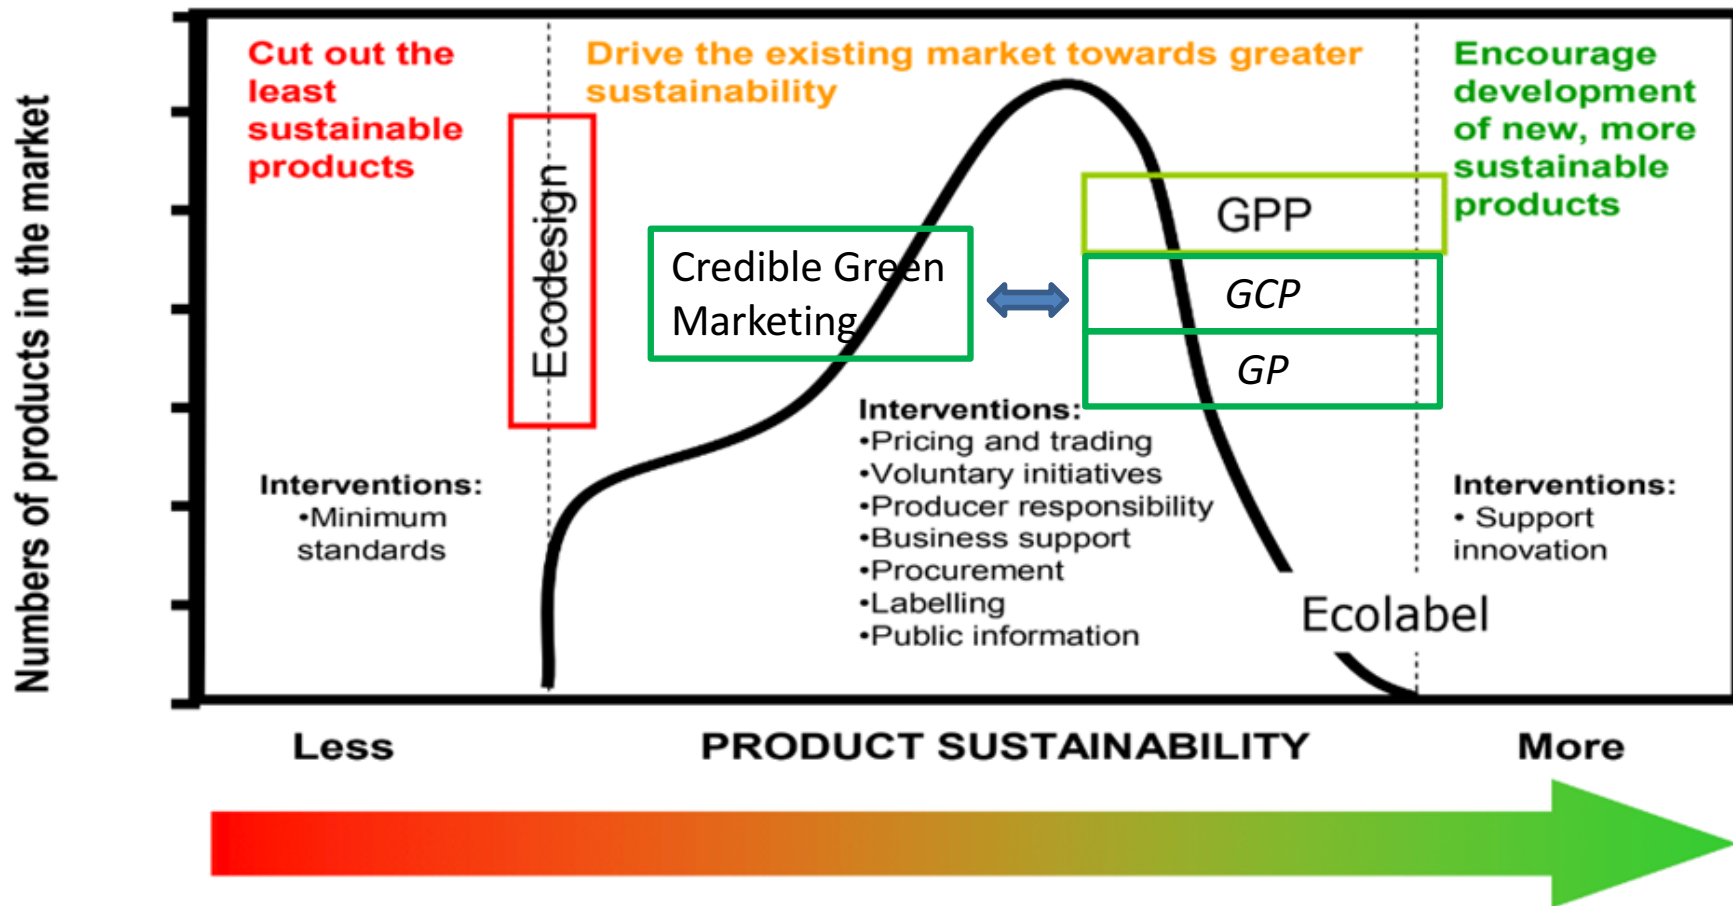

**Strength.:**

- Developed with the European business community and Commission in charge – supported by LCA experts
- The resulting LCA tool (PEF) with much reduced degrees of freedom – leads to increased reproducibility.
- Published in Official Journal (2013) – having strength of an international standard
- Rules for the development of simplistic product category PEFCRs
- A system for assessment of products relative environmental performance – the benchmark system.
- Verification protocol developed. Independent verification needed should the PEF be applied in marketing

**Weakness:**

- Firm and fast-track decision process applied. Not all LCA experts in agreement !!
- Poor participation by NGOs
- 16 LCA impact categories – a specific category for "biodiversity" a.o. missing
- Chemical assessment based on "risk" . – "Hazard" not covered to the same extent as for ecolabels (reduced precautionary principle applied)
- Discussion and approval by authorities missing (Principles of weighting, normalisation a.o.)
- No decision yet regarding future uses and governance of the system.

# Moving the market toward sustainability /circular economy – But HOW?
