

Final remarks

**Workshop on sustainability and responsible
sourcing of fishmeal and fish oil**

Copenhagen October 25th 2019

Final remarks

- **Committed to UN development goals and responsible and sustainable sourcing**
- **We if any have an interest in taking good care of our oceans and fish stocks – our livelihood – our future.**
- **Common challenges require common solutions. We wish to be part of the solutions, sustainability is a part of our DNA.**
- **We will continue working with this agenda. Thankful for the input and constructive dialogue today**
- **Do we do things the right way?**
- **The oceans contribute with 50% of the global biological production but we humans only collect 2% of our food from the oceans,**
- **Sustainable and responsible harvesting of the ocean can secure food for the growing population in the world.**
- **Improve animal health**
